

Heavy Lift Handling in Rostock

TCC 78000

Litronic®

LIEBHERR

TCC 78000

Litronic®

Characteristics

The rail mounted heavy lift crane TCC 78000 moves over 420 metres on a portal between the Liebherr-MCCtec Rostock GmbH factory site and the adjacent quayside. Equipped with a double trolley (two rails per side) and a rail gauge of 30 metres, the gantry crane provides optimum flexibility for handling all types of large-sized goods.

Customer Benefits

- Handling by experienced operating and service personnel
- Optimal positioning of the cargo due to size of the gantry
Portal: 17 m clearance, 30 m track width
- Designed for travelling with load
- Access vessels with a draught of up to 10.80 m
- Unobstructed view to the load
- Strategically well-placed land and sea connections

Specifications
